HIGH STRENGTH

Canine & Feline  
**CORTaflex**<sup>®</sup>

Solution

• For Dogs

A single formulation of the  
smaller key active isolates found in  
Chondroitin and Glucosamine  
fortified with Hyaluronic Acid

The Secret of Canine & Feline Cortaflex<sup>®</sup>

Cortaflex was formulated around the concept that smaller molecules are more likely to be absorbed than larger ones. Cortaflex is a unique formulation of the smaller key active isolates found in Chondroitin and Glucosamine (Glutamine, Proline, Glycine, Glucuronic Acid, Glutamic Acid), and must not be confused or compared with the many joint supplements that rely on the much larger Chondroitin and Glucosamine molecules.

Cortaflex is fortified with Hyaluronic Acid - a major component of joint lubricating fluid.
